Additional Information

Rolloff Yield- Rolloff Yield is the weighted average yield of the cashflows (maturities, calls and paydowns) that roll off during the noted time period. Ending Book Yield is the weighted average yield of the remaining securities at the noted time period.

Shocked Scenarios - All shocked scenarios are instant and parallel and assume a sustained rate cycle from that point on. LIBOR OAS is held constant in order to generate shocked market scenarios and The Yieldbook was used to generate the projected cash flows. In shocked scenarios, 0.01% is considered the floor.

Bonds Likely to be Called - The page identifies all callable agencies which will either be called or mature in the next 12 months in any of the shocked scenarios. The methodology used to determine the call assumes a small internal margin to account for the "cost to call."

Municipals - For taxable institutions, the above tax rate detailed - along with TEFRA adjustments for BQs - is used to calculate TEY unless otherwise input. Ratings are a blend of Moody's and Standard & Poors.

Duration - Duration in the shocked detail section is generated by Yield Book.

Original Face - If original face was not supplied, original face was estimated by dividing current face by current factor.

Yields- All yields are Yield to Projected Scenario. (Assumes 100% of The Yield Book prepayment model).

Opinions expressed are subject to change without notice and do not take into account the particular investment objectives, financial situation, or needs of investors. Employees of Stifel or its affiliates may, at times, release written or oral commentary, technical analysis, or trading strategies that differ from the opinions expressed within. No investments or services mentioned are available to "private customers" in the European Economic Area or to anyone in Canada other than a "Designated Institution." Stifel and/or its employees involved in the preparation or the issuance of this communication may have positions in the securities or options of the issuer/s discussed or recommended herein. Securities identified herein are subject to availability and changes in price.

Stifel is a multi-disciplined financial services firm that regularly seeks investment banking assignments and compensation from issuers for services including, but not limited to, acting as an underwriter in an offering or financial advisor in a merger or acquisition, or serving as a placement agent in private transactions. Moreover, Stifel and its affiliates and their respective shareholders, directors, officers, and/or employees, may from time to time have long or short positions in such securities or in options or other derivative instruments based thereon.

Readers of this report should assume that Stifel or one of its affiliates is seeking or will seek investment banking and/or other business relationships with the issuer or issuers, or borrower or borrowers, mentioned in this report. Stifel's Fixed Income Capital Markets research and strategy analysts ("FICM Analysts") are not compensated directly or indirectly based on specific investment banking services transactions with the borrower or borrowers mentioned in this report or on FICM Analyst specific recommendations or views (whether or not contained in this or any other Stifel report), nor are FICM Analysts supervised by Stifel investment banking personnel; FICM Analysts receive compensation, however, based on the profitability of both Stifel (which includes investment banking) and Stifel's Fixed Income Capital Markets. The views, if any, expressed by FICM Analysts herein accurately reflect their personal professional views about subject securities and borrowers. For additional information on investment risks (including, but not limited to, market risks, credit ratings, and specific securities provisions), contact your Stifel financial advisor or salesperson.

High yield fixed income securities, or fixed income securities that don't have credit ratings from nationally recognized statistical rating organizations, may be subject to greater fluctuations in price and greater risk of loss of income and principal, due to greater potential default risk by the associated borrowers than fixed income securities that have investment grade credit ratings from the nationally recognized statistical rating organizations.
